

**CENTRAL POULTRY DEVELOPMENT ORGANISATION & TRAINING INSTITUTE,
HESSARGHATTA, BANGALORE – 560 088**

LIST OF PARAMETERS AND CHARGES FOR ANALYSIS OF FEED SAMPLES

The Service Laboratory of the Training Institute undertakes the analysis for proximate principles, minerals, toxic substances and Metabolizable Energy content of livestock feeds and ingredients. The Nutrition Laboratories are equipped with modern instruments like UV-Visible Spectrophotometer, NIR system etc.

The charges for analysis of different parameters w.e.f. 01.04.2016 are as follows:

Sl. No.	Parameter	Amount	Sl. No.	Parameter	Amount
I	PROXIMATE PRINCIPLES		III.	Metabolizable energy	500
i.	All proximate principles	400	IV.	Toxic principles:	
ii.	Individual proximate principles:		1.	Aflatoxins	400
1.	Moisture	50	2.	Tannin	175
2.	Crude Fat (Ether extract)	100	3.	Urea	150
3.	Crude fiber	150	4.	Hydro cyanic acid	150
4.	Crude protein	100	5.	Fluorine	300
5.	Total ash	50	VII.	MISCELLANEOUS:	
6.	Acid insoluble ash	100	1.	True protein	200
II.	MINERALS:		2.	Non protein nitrogen	300
1.	Calcium	150			
2.	Total phosphorus	150			
3.	Available phosphorus	150			
4.	Salt (NaCl)	150			
5.	Manganese	150			
6.	Iron	150			
7.	Potassium	300			
8.	Copper	100			
9.	Cobalt	450			

The charges are subject to change from time to time. In case you are interested to avail the facilities, you are requested to send the ground samples of about 500 grams each by post along with a demand draft or money order for the required amount in favour of “The Director, CPDO&TI, Hessarghatta, Bangalore - 560 088. Analysis work will be undertaken only after the receipt of payment.
